Professional Experience

EYEBALL GAMES, Singapore – Singapore-based game studio founded in 2022 by the creators of 8 Ball Pool.

Senior Unity Developer, 07/2024 to 09/2025

- Worked on the **client-side development** of *Pool Masters*, handling the **UI/UX implementation**, in-game menus, front-end features, and integration with the game's core systems.
- Implemented and maintained **localization** (multi-language support with dynamic text and font asset management).
- Built and refined **in-game animations, SFX, and VFX systems**, including event-driven visual feedback for gameplay.
- Worked on **game mechanics** integration on the client side, ensuring smooth communication with backend/game server logic.
- Contributed to **performance optimization**, bug fixing, and improving the overall player experience.
- Collaborated with designers and artists to deliver polished and responsive interfaces across multiple platforms.
- Managed **version control and collaboration** using **GitHub** and **SourceTree**, supporting continuous integration and delivery (CI/CD).

Selected Accomplishments:

- Development of Pool Masters - a modern mobile 3D pool game inspired by the creators of 8 Ball Pool, featuring competitive online play, customizable cues, dynamic VFX/SFX, and a polished, highly interactive user interface.

MICRONIX SYSTEM, Brampton, Ontario, Canada – Software Development company, designing and producing applications on PC, Mac, PS and Xbox platforms.

Senior Unity Developer, 1/2022 to 7/2022 (Part-time); 4/2023 to 6/2024 (Full-time)

- Improved and developed UI, fixed bugs and developed front-end features.
- Implemented Undo/Redo feature, Configuration manager system, 3D model runtime transform gizmo, Environment hierarchy tree view inspector, 3D models dynamic inspector, 3D objects user commenting, and Encryption/Decryption of 3D models.
- Utilized technologies and tools such as Unity Engine, Unity Analytics, Cinemachine, Visual Studio, Xcode, GitHub, Zenject, Vuplex and UI Toolkit, GIT, and CI/CD.
- Employed various frameworks and languages including C#.

Selected Accomplishments:

- Development of Geogram - a spatial computing platform that employs virtual 3D replicas of physical locations.

UDEV, Dallas, Texas, USA – Game Development company, designing and producing games on Multiple platforms.

Senior Unity Developer, 2/2021 to 03/2023 (Freelance)

- Implemented the 3D character customization and saving game data to the server. Developed multiple game menus.
- Utilized technologies and tools such as Unity Engine, Shader Graph, Animation State Machine, Visual Studio, AWS, Plastic SCM, GIT, and CI/CD.
- Employed various frameworks and languages including C# and lambda.
- Utilized platforms such as Photon Unity Networking.

Selected Accomplishments:

- Development of Mythic Legions Tactics: War of the Aetherblade, a turn-based tactics game.

MOS STUDIO, Mandaluyong, Philippines – Game Studio, designing and producing games on iOS and Android platforms.

Client Programmer/Front-End Developer Lead, 3/2018 to 12/2022

- Implemented game functionality and built functional games based on design specifications and established effective strategy and development pipeline. Led the development of a game from design to deployment.
- Designed, built, and maintained efficient, reusable, and reliable code.
- Ensured the best performance, quality, and responsiveness of applications and games.
- Utilized technologies and tools such as Unity Engine, Unity Analytics, Unity Ads, Animation State Machine, Admob, Visual Studio, Xcode, Android Studio, and SourceTree, GitLab, GitHub, Photon Engine (PUN, Fusion, Realtime, Chat and Quantum), Asset Bundles, GIT, and CI/CD.
- Employed various frameworks and languages including C#, Java, and HTML.
- Utilized platforms such as GameSparks, OneSignal, Firebase, and PlayFab.

Selected Accomplishments:

- Development of Tofu Heroes, Match 3 Adventure Puzzle Game, released in beta.
- Development of Kim's Garden, Idle Planting Game, released in production.

ASIAN BUSINESS SOLUTIONS INC., Makati, Philippines – Software Development company, offers business solutions, software products and scanners.

System Analyst/Programmer, 1/2014 to 3/2018

- Engaged in system analysis, software development, and database development and administration.
- Led project planning and system design and provided project support and maintenance.
- Developed and launched the Enterprise Document Capture and Imaging Solution and Integrated Insurance and Brokerage System for multiple clients.
- Utilized technologies and tools such as, IBM FileNet, IBM WebSphere, Oracle, Eclipse, GIT, and CI/CD
- Employed various frameworks and languages including JSP, Java, JS, C++, HTML, SQL, MS SQL, PSQL, Oracle, DB2, MS Access and VB.Net.

Selected Accomplishments:

- Developed and launched the Enterprise Document Capture and Imaging Solution(EDCIS v3) a Window based system for the following clients:
 - Planters Bank(ChinaBank Savings), ACM homes, UnionBank, Ayala Land
- Developed and launched the Integrated Insurance and Brokerage System(IIBS v4) a web based system for the following clients:
 - ChinaBank Insurance Brokers Inc., LandBank Insurance Brokers Inc., Lockton Philippines, EastWest bank Insurance Brokers Inc.

Education

CAVITE STATE UNIVERSITY, Cavite City
Bachelor of Science in Computer Science, 5/2013

Selected Accomplishments:

- Undergraduate Theses, The Wild Catch in Ancient World 3D, developed using Unity 3D and 3DS Max.
