EDUCATION

B.S. Computer Science

Cavite State University

2009 - 2013

SKILLS

- Advanced proficiency in Unity and C#
- Cross-platform game development (Android, iOS, WebGL, PC)
- Gameplay systems and feature implementation
- Backend integration
- Analytics integration
- In-App Purchase (IAP) implementation
- UI/UX implementation
- Version control
- Debugging, profiling, and issue resolution
- Object-Oriented Programming (OOP) and design patterns
- Agile/Scrum development workflows
- CI/CD

PROFESSIONAL OVERVIEW

Senior Unity Developer with 8 years of experience developing multiplayer, mobile, and cross-platform games using Unity and C#. Experienced in gameplay systems, UI/UX, multiplayer integration, cloud-connected applications, and performance optimization across mobile, PC, console, and WebGL platforms. Backed by 12 years of overall software development experience, including Android app development using Kotlin, .NET, web, enterprise, and backend-integrated systems. Skilled in AI-assisted development using Anthropic Claude and GitHub Copilot for rapid prototyping, debugging, and accelerated feature development.

WORK EXPERIENCE

Senior Unity Developer

EYEBALL GAMES, Singapore

07/2024 to 05/2026

Worked on the client-side development of *Pool Masters*, a modern multiplayer 3D pool game developed by the creators of 8 Ball Pool.

- Developed and maintained gameplay-integrated UI systems, HUDs, menus, and front-end features using Unity and C#.
- Implemented localization and multi-language support with dynamic text and font asset management.
- Built event-driven VFX/SFX systems and gameplay feedback features to improve player experience and immersion.
- Integrated gameplay systems with backend and server-side logic to support multiplayer functionality.
- Optimized UI responsiveness, game performance, and client stability across supported platforms.
- Collaborated closely with designers, artists, and backend engineers in agile production workflows.
- Managed source control, feature integration, and collaborative development using GitHub, SourceTree, and CI/CD workflows.
- Contributed to a cloud-gaming prototype project for a major global streaming platform, delivering gameplay systems, UI, tutorials, and cloud-optimized game flows.

Selected Accomplishments

- Contributed to the development of *Pool Masters*, featuring competitive multiplayer gameplay, customizable cues, dynamic VFX systems, and polished interactive UI.
- Delivered a complete playable cloud-gaming prototype featuring lobby systems, tutorials, matchmaking flows, and multiple game modes for stakeholder demonstrations and testing.

Senior Unity Developer

ADDITIONAL SKILLS

- Code architecture and system design
- Team collaboration and mentoring
- Technical documentation
- Build management and deployment
- Android Development using Kotlin
- .NET Development
- API Integration

ACHIEVEMENTS

Employee of the Year nominee awardees (Asian Business Solutions Inc.), 2015, 2016 and 2017

MICRONIX SYSTEM, Canada

01/2022 to July 2022; 04/2023 to 06/2024

Contributed to the development of *Geogram*, a spatial computing platform utilizing virtual 3D replicas of physical environments.

- Improved and developed UI, fixed bugs and developed front-end features.
- Implemented Undo/Redo feature, Configuration manager system, 3D model runtime transform gizmo, Environment hierarchy tree view inspector, 3D models dynamic inspector, 3D objects user commenting, and Encryption/Decryption of 3D models.
- Utilized technologies and tools such as Unity Engine, Unity Analytics, Cinemachine, Visual Studio, Xcode, GitHub, Zenject, Vuplex and UI Toolkit, GIT, and CI/CD.
- Employed various frameworks and languages including C#.

Selected Accomplishments:

- Development of Geogram - a spatial computing platform that employs virtual 3D replicas of physical locations.

Senior Unity Developer

UDEV, USA

02/2021 to 03/2023

- Implemented the 3D character customization and saving game data to the server. Developed multiple game menus.
- Utilized technologies and tools such as Unity Engine, Shader Graph, Animation State Machine, Visual Studio, AWS, Plastic SCM, GIT, and CI/CD.
- Employed various frameworks and languages including C# and lambda.
- Utilized platforms such as Photon Unity Networking.

Selected Accomplishments:

- Development of Mythic Legions Tactics: War of the Aetherblade, a turn-based tactics game.

Client Programmer/Front-End Developer

MOS STUDIO, Philippines

03/2018 to 12/2022

- Implemented game functionality and built functional games based on design specifications and established effective strategy and development pipeline. Led the development of a game from design to deployment.
- Designed, built, and maintained efficient, reusable, and reliable code.
- Ensured the best performance, quality, and responsiveness of applications and games.
- Utilized technologies and tools such as Unity Engine, Unity Analytics, Unity Ads, Animation State Machine, Admob, Visual Studio, Xcode, Android Studio, and SourceTree, GitLab, GitHub, Photon Engine (PUN, Fusion, Realtime, Chat and Quantum), Asset Bundles, GIT, and CI/CD.
- Employed various frameworks and languages including C#, Java, and HTML.
- Utilized platforms such as GameSparks, OneSignal, Firebase, and PlayFab.

Selected Accomplishments:

- Development of Tofu Heroes, Match 3 Adventure Puzzle Game, released in beta.

- Development of Kim's Garden, Idle Planting Game, released in production.

System Analysis/Programmer III

ASIAN BUSINESS SOLUTIONS INC., Philippines

01/2014 to 03/2018

- Engaged in system analysis, software development, and database development and administration.
- Led project planning and system design and provided project support and maintenance.
- Developed and launched the Enterprise Document Capture and Imaging Solution and Integrated Insurance and Brokerage System for multiple clients.
- Utilized technologies and tools such as, IBM FileNet, IBM WebSphere, Oracle, Eclipse, GIT, and CI/CD
- Employed various frameworks and languages including JSP, Java, JS, C++, HTML, SQL, MS SQL, PSQL, Oracle, DB2, MS Access and VB.Net.

Selected Accomplishments:

- Developed and launched Enterprise Document Capture and Imaging Solution(EDCIS v3) a Window based system for the following clients:
 - Planters Bank(ChinaBank Savings), ACM homes, UnionBank, Ayala Land
- Developed and launched the Integrated Insurance and Brokerage System(IIBS v4) a web-based system for the following clients:
 - ChinaBank Insurance Brokers Inc., LandBank Insurance Brokers Inc., Lockton Philippines, EastWest bank Insurance Brokers Inc.
